-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

The recitation “plug-in” has not been given patentable weight because the recitation occurs in the preamble. A preamble is generally not accorded any patentable weight where it merely recites the purpose of a process or the intended use of a structure, and where the body of the claim does not depend on the preamble for completeness but, instead, the process steps or structural limitations are able to stand alone. See *In re Hirao*, 535 F.2d 67, 190 USPQ 15 (CCPA 1976) and *Kropa v. Robie*, 187 F.2d 150, 152, 88 USPQ 478, 481 (CCPA 1951).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 4 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tsai (U.S. Patent No. 5,798,849).

Regarding claim 1, Tsai discloses an optical scanner equipped with calibration film, which the optical scanner provides light incident upon a transmission-typed document and catches the image signals of the transmission-typed document by an optical chassis, comprising:

a scanning zone, capable of providing for placing the transmission-typed document (fig.4, scanned object 8, col. 4, lines 1-24); and

Art Unit: 2622

at least one attachment, capable of providing a calibration film for enabling the optical chassis to retrieve the image signals so as to improve the image brightness (figs. 2-4, col. 3, line 38 through col. 4, line 59).

Regarding claim 2, Tsai discloses the optical scanner equipped with calibration film of claim 1, wherein the attachment is a recess, and the calibration film is connected with the recess by pasting (fig. 2, col. 3, lines 41-56).

Regarding claim 4, Tsai discloses the optical scanner equipped with calibration film of claim 1, wherein the calibration film is a positive calibration film (col. 4, lines 25-53).

Regarding claim 5, Tsai discloses the optical scanner equipped with calibration film of claim 1, wherein the calibration film is a negative calibration film (col. 4, lines 25-53).

Allowable Subject Matter

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
